

FL Supreme Court Approves Governor's Request for COVID Shot Investigation

TALLAHASSEE, FL – Yesterday, the Florida Supreme Court approved Governor Ron DeSantis' request to impanel a grand jury to review evidence to hold COVID-19 injection manufacturers accountable under Florida law.

Governor DeSantis held a "Public Health Integrity Committee" live roundtable conference on December 13 with medical professionals and vaccine injured citizens and announced that the State of Florida is taking action to hold pharmaceutical companies accountable for COVID shot-related injuries and misconduct. Governor DeSantis stated, "In Florida, it is against the law to mislead and to misrepresent, particularly when you're talking about the efficacy of a drug."

The order from the Florida Supreme Court read, "1. A state-wide grand jury shall be promptly impaneled for a term of twelve calendar months, to run from the date of impanelment, with jurisdiction throughout the State of Florida, to investigate crime, return indictments, make presentments, and otherwise perform all functions of a grand jury with regard to the offenses stated herein. 2. The statewide grand jury shall be drawn from the certified jury lists submitted by the chief judges of the Fifth, Sixth, Tenth, Twelfth, and Thirteenth Judicial Circuits." "3. The Honorable Ronald Ficarrotta, Chief Judge in and for the Thirteenth Judicial Circuit, is designated as presiding judge over the statewide grand jury. In his capacity as the presiding judge, the Honorable Ronald Ficarrotta shall maintain judicial supervision of the

statewide grand jury, and all indictments, presentments, and formal returns of any kind made by such grand jury shall be returned to the presiding judge. The presiding judge may designate an alternate presiding judge in the event of calendar conflicts or otherwise and to assist in the administrative process of the statewide grand jury. 4. John A. Tomasino, Clerk of the Supreme Court of Florida, is hereby designated clerk of this statewide grand jury and is empowered to deputize any clerk of a circuit court or any deputy clerk of a circuit court to issue necessary process and to carry out the administrative functions of the statewide grand jury," the order read.

During the conference, Florida Surgeon General Dr. Joseph Ladapo said that Florida will be increasing surveillance regarding scientific dishonesty and media dishonesty. As Dr. Ladapo discussed the pharmaceutical companies' unethical relationship with the media, he said, "Our media has clearly demonstrated that it is impossible to accurately report on something when you are taking money from that same something." Dr. Ladapo referred to a recent study done from a German university that performed autopsies on individuals who died suddenly within a few weeks of receiving a COVID-19 shot. It revealed that four out of 35 people who had died suddenly had myocarditis that was specifically attributed to the mRNA shot.

Ladapo stated, "It's important to note that all of these people died suddenly at home and these people are not counted in the estimates that the CDC likes to pretend are accurate. We will be studying the incidents of myocarditis within a few weeks of COVID-19 vaccination for people who died. This is going to be a surveillance study with

some of our medical examiners in Florida and researchers from the University of Florida. We will answer this question that probably keeps the CEOs of Pfizer and Moderna awake at night."

Dr. Peter McCullough, internist, cardiologist and highly published on cardiovascular research, has publicly stated the COVID-19 mRNA injection is toxic, dangerous, and the cause of sudden cardiac death in many.

In fact, when Dr. McCullough began speaking out in 2021, he called the mRNA injections of spike protein among the most toxic substance ever injected into a human being. He stated, "There now are 200 papers showing that myocarditis (from the COVID vaccine spike protein) causes heart damage and a scar, and then the scar becomes the basis for a cardiac arrhythmia, and then the arrhythmia is responsible for the sudden death on a massive scale in younger people – it's my view that it's the COVID-19 vaccine until proven otherwise. If a healthy person suddenly dies, and there's no antecedent disease, it's the vaccine until proven otherwise."

Liberty Counsel Founder and Chairman Mat Staver said: "If vaccine companies were held to the same standards of liability that drug manufacturers must shoulder, the COVID-19 shots would have ended months ago. These shots are all profit and no accountability, and that must change. Sadly, many lives have already been taken as a result. Thankfully, Governor Ron DeSantis is taking the lead to investigate the biggest vaccine fraud in history." Visit: LC.org

From Department Of Defense Rescinds Page: 7 COVID Shot Mandate for Military

... the memo reveal that the service members who applied for religious accommodation requests will continue to have adverse actions in their personnel files. The Department of Defense and the military branches have taken the position that any service member who requested a religious accommodation request was disrupting good order and discipline. Astoundingly, those who defend the Constitution and the laws of the land are considered insubordinate when they request that the laws for which they pledge their lives be upheld. This is the twisted world under the Biden administration. Our legal case will continue because without the injunctions, service members will continue to face retaliation for requesting a religious accommodation. Service members who have been loyal to the country and faithful to their religious convictions have suffered greatly under this mandate, and we will continue to seek justice for them."-www.LC.org
